## BARRELS OF AIR BURNED AS

New, Remarkable Stove-Ohioan's Great Invention-Consumes 395 Barrels of Air to One Gallon of common Kerosene oil, making oil-gas-the New Fuel that looks and burns like Gas!

Wood, coal and oil all cost money. ONLY FREE FUEL IS AIR! Unlimited supply—no trust in woman has as a matter of course, is the very personification of luxury in all its control. Air belongs to rich and poor alike. We can't burn air alone, but see here! Our wonderful stove burns air and gas-very little gas-principally air. Takes its fuel almost entirely from the atmosphere.

A miniature gas works-Penny fuel for every family-save 1/2 to 1/3 on cost-save dirt and drudgery-no more coal or wood to carry-ashes unknown-absolute safety.

### SEE HOW SIMPLE! TURN A KNOB---TOUCH A MATCH---FIRE IS ON. TURN AGAIN---FIRE IS OFF! THAT'S ALL.

Astonishing but true-time-tested-proven facts-circulars give startling details-overwhelming evidence. NO SUCH STOVE SOLD IN STORES-UNLIKE ANYTHING YOU'VE SEEN OR HEARD OF. warm, perfumed bath prepared by her maid awaits her, but she must give her order for such fully nine hours in ad-

ect control—no leaks, nothing to close or clog up.
Your hand upon a knob—a turn to right op left, the oil is automatically fed to a small steel burner bowl or open trough, when it is instantly changed into gas, which is drawn upwards between two red-hot perforated steel chimneys, all the while drawing in about one barrel of air to every large spoonful of oil consumed, making quick, intense heat, which is condensed into a small space for cooking or distributed through oven for baking.

Every drop of fuel consumed—goes into heat—making hottest gas fire—

Every drop of fuel consumed—goes into heat—making hottest gas fire—hothing wasted—requires no pipes or flue connections—use it anywhere about the house, office or store—move it about as often as you like.

This invention has been fully Protected in the U. S. Fatent Office, and is known as the Harrison Valveless, Wickless, Automatic Oil Gas and Air Generator, the only one yet discovered that consumes the carbon and by-products of the oil.

The extremely small amount of kero-The extremely small amount of kero-

The extremely small amount of kero-bene oil that is needed to produce so large a volume of gas makes it, we be-lieve, the most economical fuel on earth, and the reason for the great success of this generator is based on the well-known fact of the enormous expansive-ness of oil-gas when mixed with common air.

Rerosene oil from which oil-gas is made is sold by all grocers—buy as consumed—as you would for a lamp—gallon lots or two—let pennies do the work of dollars and save the difference. At last humanity is blessed with a cheap fuel that makes no dirt, ashes, soot—removing forever the greatest nuisance that women folks ever suffered.

What a pleasure to just turn the knob—touch a match—a beautiful gas flame appears—hottest fire—always ready—day or night—on or off at will—self-regulating—no more attention—could anything be more perfect?

It generates the gas only as needed—simple, handsome, durable, easily operated, and another feature is its perfect safety.

PEOPLE.

HOW TO GET ONE.

All the lady readers who want to enjoy the pleasure of a gas stove—the cheapest, cleanest and safest fuel—save one third to one-half on fuel bills and do their cooking, baking, ironing and canning fruit at small expense, should have one of these remarkable stoves.

Space prevents a more detailed description, but these oil-gas stoves will bear out the most exacting demand for durability and satisfactory properties. If you will write to the only makers, If you will write to the only makers, trated pamphlet describing this inventor, and also letters from hundreds of delighted users, you will receive much difficult to imagine where that amount of money could be invested in anything eight they prefer not to accept such hospitality.
